fax (713) 977-4164
e-mail stopit@indumar.com

Lunch provided:

Tortugas Coastal Cantina

Date & Time:

April 29, 2003 at 10:30 am

Repair Pipe Leaks **FAST**
with the STOP IT® Pipe
Repair System for
Hazardous Material Spill
Control that works on all
metal and plastic pipes.

As Featured in
*American Industrial
Magazine*

The STOP IT® Pipe Repair System plugs leaks in any pipefitting configuration. It is 100% resistant to all fuels and highly chemical resistant. STOP IT® has been successfully used for HazMat spill control in thousands of situations and adds the structural strength required for safe transportation reducing the potential for further spills. It has also been used in chemical plants, refineries, municipal water and wastewater utilities, electric utilities and many other applications. The included FIX STIX™ hand-moldable epoxy is NSF certified and safe for use on potable water. Pipes are wrapped with a knitted fiberglass tape, already pre-coated with a water activated urethane system, which can be applied by one person with no mixing, measuring or hot work. STOP IT® sets in 5 minutes, cures fully in 30 minutes and conforms around elbows, tees and other fittings. The surface of the pipe does not have to be clean or dry, just rough. STOP IT® can be applied right over an old rusty line, and

can be applied completely underwater or buried underground. After the 30-minute cure, STOP IT® will withstand up to 400 PSI and 500 F and has excellent chemical resistance. STOP IT® reinforces the structural integrity of joints, with tests showing that STOP IT® adds over 2,000 lbs. of pullout strength to a 2" PVC coupling. STOP IT® can also be used on electrical conduit or any cable cover. STOP IT® can be the fastest, lowest cost solution for most leak situations.

The STOP IT® Pipe Repair System and other fine products are manufactured by Indumar Products, Inc., 2500 Tanglewilde, Suite 260, Houston, TX 77063, Toll Free 1-800-523-7867, or (713) 977-4100, fax (713) 977-4164, e-mail stopit@indumar.com, web site www.stopit.com.
